

Foam Dressing

Description:

- A conformable polyurethane foam pad with transparent adhesive border film impermeable to liquids, bacteria and viruses

Features:

- Highly absorbent, breathable
- The unique design ensures fast and easy application on wounds over body contours
- The wound dressing is a fast wicking, non-swelling polyurethane foam with a highly breathable film backing which prevents wound exudate strike-through and external contamination
- Bordered edges for added protection
- Designed for long wear time

Specification:

- Material - Non Woven, polyurethane foam pad
- Sterile

Application:

- For control of moderate to heavy exuding wounds
- Could be used as an absorbent cover dressing over wound fillers such as alginates or gauze dressing
