

# Pre-Measured range of BLOOD PRESSURE CUFFS

Made in England

The **Accoson Pre-Measured Blood Pressure Cuff** with RANGE-FINDER has been introduced to help the user select the correct size of cuff for the patient's limb. This selection process is important, as the use of an unsuitable cuff size can result in errors in the readings obtained.

Each Pre-Measured cuff is marked with the upper and lower limits of limb circumference to which the cuff is suited. A comprehensive range of cuffs is available. each size clearly named

## USING THE ACCOSON Pre - Measured VELCRO CUFF

- Offer the Pre-Measured cuff to the patients limb positioning the arrow marked ARTERY over the brachial artery
- Ensuring a snug fit. start to close the cuff and observe if the leading edge of the rubber bag compartment engages within the limits of the RANGE-FINDER. If it does the cuff is suited to the limb. If not a larger or smaller cuff should be used. or the possibility of error considered
