

Transparent Film Dressing

Description:

- A breathable transparent self-adhesive film dressing designed for protection of skin and wound sites

Features:

- Clinician friendly – quick and easy application
- Thin film - conforms to the body and skin contour for greater patient comfort
- Transparent – allow easy monitoring of wounds without the need to remove dressing
- Breathable film - allows moisture vapor and oxygen exchange while providing a moist wound environment for enhanced healing
- Waterproof film backing - provides a bacterial and viral barrier to outside contaminants. Allows the patient to shower

Application:

- For general wound management
- For use over I.V. Sites, superficial burns, lacerations, abrasions, closed surgical wounds and donor sites
- Can also be used as secondary dressing to cover dressings such as hydrogels, alginates and foam dressing

Specification:

- Material – Polyurethane Film
- Water proof
- Sterile
